

# User Stories

- Break down requirements into **specific user interactions** with the system
  - As a *description of user*, I want *functionality* so that *benefit*
    - User: Type of user who wants this feature
    - Functionality: What the user wants to do
    - Benefit: Reason why the user wants this feature
- 

1. As a **high school student**, I want to have a **personalized time management questionnaire** that **caters to my specific needs**.
2. As a **high school teacher**, I want a **highly restricted AI application** so that I can **introduce the ethical use of AI into my classroom**.
3. As a **busy student**, I want to have a **minimalistic interface** to **ensure easy navigation of the application and the mitigation of procrastination**.
4. As a **distracted student**, I want to have the **option to integrate personalized music playlists** so that it can **motivate me in completing my tasks**.
5. As a **disorganized student**, I want to have a **layout of my weekly tasks** so that I can **improve my management skills**.
6. As an **workaholic student**, I want to **break down my work intervals** so that I can **learn to let myself rest between work sessions**.
